Presentation Modes (√)	Oral Presentation	()
	Poster Presentation	()
Detailed Session Topics (√)		
() 1. Geographical evidences for Gondwana assembly and fragmentation		
() 2. Global event markers during Gondwana evolution		
() 3. Paleontology and Biodiversity during Gondwana period		
() 4. Mixed floras: Gondwana-Laurasia biotic interchanges		
() 5. Sedimentary record and sea level changes		
() 6. Correlation and age constraints		
() 7. Permian-Triassic boundary events		
() 8. Palaeoclimatic events: biological, geochemical, sedimentological and isotopic proxies		
() 9. Palaeofires in Gondwana		
() 10. Energy resources		
() 11. Tectonic Geography of the Amalgamation of Gondwana		
() 12. Pre-Gondwana Supercontinents		
() 13. Tectonic Evolution of Gondwana		
() 14. Structure and Tectonic record of break-up of eastern Gondwana and its evolution into Asia		
() 15. Metallogeny and Superrecontinents		
() 16. The continent of Gondwana formed from large parts of Rodinia that amalgamated and grew from the Palaeoproterozoic		
() 17. The amalgamation of many disparate continents along with new crust that formed in the latter part of the Proterozoic.		

Abstract title
Abstract (within 400 words)
Please check (√ or X): () Abstract () Extended abstract
Keywords:
Remark: (For committee)

Note: 1. Deadline for Abstract on 31st July 2017

2. Extended abstract please attach the abstract file to secretarygondwana.16@gmail.com
